

Atlantic City Electric is giving away more than 1,000 free trees to its residential customers through the Arbor Day Foundation's Energy-Saving Trees program. Atlantic City Electric customers are able to reserve one free tree per household by visiting <https://arborday.org/ace>. Customers can choose one-gallon trees in various selections, including bald cypress, river birch, serviceberry and sweetgum. In light of the COVID-19 pandemic and stay at home orders in New Jersey, all trees will be delivered to each customer's home between four and six weeks from when an online reservation is completed.
