Why Testing is Still Critical

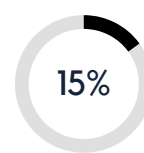

New Jersey Health Commissioner Judith Persichilli mentions data from June 12th, 2021 compared to data today shows an uptick in new infections in young children:

< 4 years old

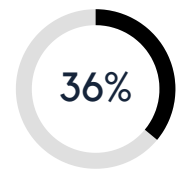

"For those **4 years of age and under**, case rates per 100,000 have increased **29%**."

5-10 years old

"For those **5 to 10 years of age**, the case rate has increased **15%**"

11-13 years old

"For those **11 to 13 years of age**, case rates per 100,000 have increased **36%**."

Certifications

- **CLIA:** 31D2109691
- **EUA**
